#### CREATING YOUR OWN BACKGROUNDS

You can design your own Background and have it approved by your Referee.

INTO THE DUNGEON: REVIVED

Usually, the Background should provide items from the character's past life (with a rough value of 10–12 Shillings) and some role-playing benefit.

#### WEATHER

Keep in mind that different climates might require Flying creatures travel for 8 hours/day before restadjusting the tables. For example, you might want ing for the night. Flying magic items have the energy to use the Sky table with a d8 or d12 roll for dry cli- to function for the same daily amount of time. mates or d12 + 8 for rainy ones.

To decide for how many days the current weather persists, choose an appropriate die from d4 to d12, depending on the climate and weather type.

When following the prevailing wind's direction, roll 2d8 and take the higher result; when going against it take the lower one.

Wind Force might affect your sailing speed.

Harsh Weather impairs vision and ranged combat, and prohibits Resting before a shelter is found.

Extreme Weather (blizzard, hail, etc.) might even inflict continuous Damage (usually d4/hour).

**Swimming** in stormy waters requires a DEX Save. On fail, you are submerged and must hold your breath until passing a DEX Save on the next turn.

Holding Breath is possible for STR/5 turns (round up). Turns spent on strenuous tasks count for two. Afterwards, take d6 Damage per turn not breathing.

#### AERIAL TRAVEL

Full speed is only possible with ½ of riders or less. Otherwise, the speed is halved.

Aerial Vehicles travel for 12 hours/day. Double crew allows to continue travelling at night.

Balloons always follow the wind direction. Every 2 hours of travel you may change altitude to catch a preferable wind (roll for a new wind direction).

Airships are affected by winds in the same manner as sailing ships.

#### MOVEMENT IN COMBAT AND EXPLORATION

Each combat turn (1 minute) characters move their travel Grid value × 10 feet (generally 30 feet; ±10 feet for clear or difficult terrain; ×½ when encumbered; ×2 when forgoing any actions this turn).

For time-tracking purposes, exploration activities take 10 minutes: casting Spells outside of combat, exploring a new area, lockpicking, resting, etc.

#### 2. PLAYING THE GAME

#### RULES

#### Saves

Roll d20 equal or under the appropriate Ability Score to succeed. 1 is always a success and 20 is always a failure.

#### Advantage and Disadvantage

Whenever someone has increased or decreased odds of succeeding on a Save, the Referee may give them Advantage or Disadvantage. Roll twice and take the better or worse of the two rolls respectively. Advantage and Disadvantage cancel each other out.

#### **Taking your Turn**

In a combat situation, the Referee decides which side acts first. When this is unclear, player characters must pass DEX Saves to be able to act before their opponents. After such initial turn, all player characters act together as usual, 1 minute per combat turn.

Each turn, characters can **move** about 30 ft. (or **change items** they are holding instead) and **then** carry out one **action** (or forgo it for another **move**).

At the start of the turn, all characters declare their intentions, and **after that** the dice are rolled.

#### Attacking

Roll your weapon's Damage die, or for both weapons if wielding two, along with any bonus Damage dice you have. The highest single roll is identified, and the attack causes this much Damage.

Ranged weapons cannot be used while engaged in melee combat.

#### Ganging Up

Each target can take a single die of Damage in a turn.

When multiple attackers choose the same target, they roll together in a single attack, keeping the highest result, plus 1 point of Damage for each additional attacker, up to +5. Once the attack has been resolved, the target cannot be attacked again until their next turn.

Attacks that reduce Ability Scores are grouped together by the Ability Score and resolved the same way, separate from normal attacks.

#### Ganging Up: Easy Mode (optional)

For a more "cinematic" combat feel, you may forgo bonus Damage from additional attackers.

#### Impaired and Enhanced Attacks

Attacks that are Impaired, such as firing through cover or a resistant target, roll d4 Damage regardless of weapon, no bonus Damage dice allowed.

INTO THE DUNGEON: REVIVED

Attacks that are Enhanced by a risky stunt or a vulnerable target gain bonus d12 Damage die.

Enhancement and Impairment negate each other.

#### Manoeuvres

Instead of making a normal attack, you may spend your turn trying to carry out another manoeuvre, such as knocking an opponent down, snatching an item or fleeing. In these cases, the side most at risk makes a Save to avoid consequences.

#### Armour

Armour subtracts its score from the result of any Damage rolls against the wearer.

If the Damage bypasses HP, it is still affected by the target's Armour unless stated otherwise.

Total Armour score for a creature cannot exceed 3.

#### Mounted Combat

Mounted troops in melee gain +1 Armour and bonus weapon Damage die against unmounted opponents but generally cannot employ two-handed weapons. On clear terrain, their **move** in combat is doubled.

#### Damage and Critical Damage Saves

When taking Damage, lose that many Hit Points. If you have any HP left, then the attack was mostly avoided or only a minor wound was inflicted.

When you run out of HP, any remaining Damage is removed from your STR score. Now you must pass a STR Save to avoid Critical Damage.

#### Blast Damage

Blast attacks affect all targets in the appropriate area, rolling once for each target. If unsure how many targets are affected, roll Damage die.

#### Critical Damage

On a failed Critical Damage Save, characters take Critical Damage and are unable to take further action until they are tended to by an ally and have a Rest. If they are left untended for an hour, they **die**.

#### Ability Score Loss

The character **dies** at STR 0. At DEX 0 or WIL 0 the character is **paralysed** or **catatonic** respectively, cannot act until Healing and must be carried to safety.

#### RATIONS

While seafaring or travelling through inhospitable land it might be important to know the amount and weight of the rations required in your journey.

| Daily ration | Cost | Food   | Water  |          |
|--------------|------|--------|--------|----------|
| Human        | 5р   | 2 lb   | ½ gal  | (4 lb)   |
| Horse        | 1p   | 20 lb  | 5 gal  | (40 lb)  |
| Elephant     | 1s   | 200 lb | 50 gal | (400 lb) |

Lack of rations prohibits Resting and Healing. A day without enough water or a week without enough food results in d4 STR Loss.

#### RESOURCES

| Amount | Description      | Average | Price |
|--------|------------------|---------|-------|
| 1      | running out      | 1       | × 1   |
| 2      | low              | 3       | × d6  |
| 3      | enough (default) | 5       | × 2d6 |
| 4      | plenty           | 8       | × 3d6 |
| 5      | excess           | 14      | × 4d6 |
|        |                  |         |       |

Each time you **spend** a resource (or after combat for ammo), roll a d6. If you roll **over** the **Amount**, decrease it by one. On zero the resource is depleted.

If you **scavenge** for the resource, roll a d6. If you roll **over** the **Amount**, increase it by one (up to 5).

When **buying** resources to increase the **Amount** by one (up to 5), pay its price multiplied by your current Amount × d6. One piece of **ammo** costs **1p**.

#### SELLING

A chance to find a buyer for a pricey object is X-in-6 based on its cost and the settlement. You can repeat the search in the same settlement after d6 months.

| gold:   | <1 | 1+ | 10+ | 100+ | 1k+ | 10k+ |
|---------|----|----|-----|------|-----|------|
| Village | 2  | 1  | _   | _    | _   | _    |
| Town    | 4  | 3  | 2   | 1    | _   | _    |
| City    | 6  | 5  | 4   | 3    | 2   | 1    |

After finding a buyer, make a WIL Save. On a failed save, you sell for a  $\frac{1}{4}$  price. If you roll under your WIL Score by 10 or more, you sell for a full price, otherwise you sell for a  $\frac{1}{2}$  price. The chance of barter instead of monetary exchange is (6–X)-in-6.

**Selling Magic Items** will have a higher chance of barter, while search roll and WIL Save are rolled at Disadvantage. Price for Scrolls is d10s × Circle, consumables: d10×10s × Circle, wands and rods: d10g × Circle, other items — on a case-by-case basis.

**Construction Crew** (four dozen people led by a master, paid 50s per week) build 5g of structure cost weekly, 1g for stone construction. Up to 5 crews can work on a single structure simultaneously. Speed and cost might be impacted by external factors.

**Siege Engines** could be installed on gatehouses (1), big towers (1), small keeps (2), and big keeps (4).

#### SIEGE ENGINES

Require a crew of three and a whole turn to reload. A reduced crew will reload in two or three turns.

| Engine   | Cost | Damage    | Ammo     |
|----------|------|-----------|----------|
| Ballista | 1g   | d12       | 10s bolt |
| Catapult | 10   | d10       | 5s ball  |
| Catapuit | 1g   | d10 Blast | 20s bomb |
| Cannon   | 2g   | d12 Blast | 25s shot |

The weight of a siege engine is about 1 ton and it requires a draft animal to transport overland.

#### STRUCTURAL DAMAGE

The Armour range represents the material thickness. Large and bigger objects usually ignore Damage

Large and bigger objects usually ignore Damag from anything but siege engines and such.

#### SIZE SCORE AND POPULACE

Size Score, or SIZ, is a measure of the populace of your Domain and may reach a maximum of 20.

| SIZ | Populace | SIZ | Populace | SIZ | Populace  |
|-----|----------|-----|----------|-----|-----------|
| 0   | <100     | 7   | 7,500    | 14  | 100,000   |
| 1   | 100      | 8   | 10,000   | 15  | 150,000   |
| 2   | 300      | 9   | 15,000   | 16  | 200,000   |
| 3   | 600      | 10  | 20,000   | 17  | 300,000   |
| 4   | 1,000    | 11  | 30,000   | 18  | 500,000   |
| 5   | 3,000    | 12  | 50,000   | 19  | 750,000   |
| 6   | 5,000    | 13  | 75,000   | 20  | 1,000,000 |

At the start of each month, choose Domain Focus — this goal is achieved at the end of the month:

- + Funding: You spend 1s for each of your populace this month. Choose an extra Domain Focus. You do not need to roll for Unrest this month.
- + Taxation: You gather extra money this month, gaining 1s for each of your populace.
- + Growth: Roll d20. If this is higher than your thing but siege engines and such. SIZ, then your SIZ is increased by 1.
- + Conscription: Recruit an army (see Training Soldiers). SIZ is decreased by one, and you cannot repeat Conscription until it increases again. Next Growth roll will have Disadvantage.
- + **Prosperity:** You do not need to roll to see if there is Unrest in your Domain this month.

**Unrest:** At the **end** of the month, roll d20. If this is lower than your SIZ, there is Unrest in your Domain. 10% of populace revolts and can seize control of your Domain unless quashed. SIZ is decreased by one.

### ARMIES AND WAR

Training Soldiers: 20% of populace are fit for calling into service as poorly skilled conscripts (3hp). A further 1% of your populace are professional soldiers (STR 12, 5hp, Novice Warrior). All troops must be equipped as required.

An army that won a battle against an equal or stronger opponent can be trained further at the rate of 1% of your populace per month.

Conscripts become soldiers (1s/person), and soldiers become champions (10s/person) (STR 14,

Large Battles: When handling large numbers of combatants (usually 10 or more), they should be massed together as a unit. Units have the same Hit Points as a single combatant, but add 1 Damage for as many times to one they outnumber their opponents (or subtract if outnumbered), from -5 to +5. E.g., a unit of 200 cavemen fighting 50 spearmen outnumber them 4-to-1, gaining 4 bonus Damage.

When units take Critical Damage, their numbers are halved and they must pass a WIL Save or break and disband. At STR 0 they are wiped out.

Individual attacks against units are Impaired.

Unit attacks against individuals are Enhanced, add +5 bonus Damage, and cause Blast Damage.

Unit attacks that cause Blast Damage against units have bonus weapon Damage die.

Sieges: Wooden walls have 6hp, Armour 6, and stone walls have 8hp, Armour 8. Reducing a wall to 0hp allows passage over it. Walls and other defensive structures usually ignore Damage from any-

Siege Engines cause d12 Blast Damage.

See Structures and Sieges in Appendix A for more details and additional information.

1 lb equals 100 gold guilders, 1000 silver shillings, or 1000 copper pennies in weight.

#### ENCUMBRANCE

Heavy load halves the speed and reduces HP to 0. The same happens when carrying more than three bulky items. Items are considered bulky if they require both hands to carry or are otherwise unwieldy, for example, two-handed weapons, a set of armour, a Mystic's Tome, a pot of black powder, wearing full armour without Ironclad Feature, etc.

#### **MADNESS**

you might want to track characters' sanity.

Each time the character suffers an exposure to a source of supernatural dread, succeed on a WIL Save or gain a Madness Level.

A good night's sleep lowers Madness Level by 1.

When the Madness Level exceeds the character's Experience Level, the character goes insane. Roll for Immediate and Prolonged Effect. Prolonged Effects require a Healing Service to get rid of.
